

The Zona Decorative Concrete & Construction, LLC philosophy and business plan is to provide quality and service to not only contractors with projects of large scale, but to focus on Homeowners that have needs of a smaller size.

Zona specializes and caters to the "small guy". The owner of Zona Decorative Concrete has 25 years experience in the decorative concrete field and 6 years experience working for a local custom home builder. Being a 3rd generation concrete contractor, Mac knows what it takes to provide a quality product.

When it comes to durability, style and versatility, concrete is an excellent choice for concrete floors and other exterior hardscape decorations, such as driveways, patios, outdoor living spaces, seat-walls and walkways, or interior surfaces, such as walls or fireplaces.

Concrete can not only be shaped into practically any form, but a wide selection of various textures and finishes can be applied to provide a unique look that enhances your specific Tucson home or business design.

If you're in the market for a new Tucson kitchen, bathroom or BBQ countertop, you should consider concrete which has several advantages over other materials.

Concrete counter-tops offer substantial strength, can be sculpted into practically any shape, and is easily dyed or stained to a color of your choice. We can even add elements such as recycled glass, decorative aggregate or fossils to concrete and polish the surface to expose these key ingredients.

Concrete counter-tops provide unique and intriguing patterns, designs, textures and colors. We also offer custom concrete furniture pieces fabricated in our concrete artisan studio.
